

The Municipal District of Wainwright

together with

Alberta Onsite Wastewater Management Association and Land Stewardship Centre

Presents

**Septic Sense:
Solutions for Rural Living**

March 12th, 2018 at the Wainwright Communiplex Hall 1
6:00 p.m.

Understanding and taking care of your septic system

Did you know the average person puts 340 liters of sewage through a private sewage system (septic system) every day? For a family of four living in a two-bedroom house, that amounts to 1,360 liters per day and just under half a million liters per year!

Rural property owners are responsible for ensuring their systems operate properly and safely. If you have a septic system on your rural property, you will benefit from attending this workshop. Presenters will teach you how to understand, assess and properly manage your septic system, enabling you to protect your investment in your property and the valuable natural assets associated with your land.

Learn what you can do to properly manage and maintain your septic system. Attend the **Septic Sense** workshop hosted and presented by the **M.D. of Wainwright**, with technical expertise provided by the Alberta Onsite Wastewater Management Association (AOWMA) and materials developed by Land Stewardship Centre (LSC).

During the workshop we will cover:

- What a septic system is and how it works
- Regulations
- Design and installation
- Appropriate use of your septic system
- Maintaining your septic system
- Troubleshooting

To attend the workshop, please pre-register by calling **Tanis Ponath** at the **M.D. of Wainwright** Office at: **780-842-4454** or by emailing asb@mdwainwright.ca. Please register by March 9th, 2018.

Brought to you by:

**Alberta Onsite Wastewater
MANAGEMENT ASSOCIATION**
