

## **Precautionary Boil Water Advisory in Effect**

### **Hamlet of Greenshields Water System**

Be advised that construction on the Hamlet of Greenshields water system is scheduled to start Today June 03, with weather permitting, and continue for 3 to 4 days. Residents can expect interruptions in the water supply that could last up to 4 hours. Please store water for personal use. The water system will be functional in the evenings and residents will need to follow the Precautionary Boil Water Advisory.

**The Precautionary Boil Water Advisory will affect all residents starting June 3, 2026 for the duration of the construction period** and will remain in place until construction is complete and water sample results have been approved by Alberta Health Services. We appreciate your patience and cooperation during this work.

During this project, the MD of Wainwright will be installing additional isolation valves. These upgrades will allow smaller sections of the water system to be shut off during unplanned maintenance events and will help to reduce service disruptions in the future.

#### **How to Use Water Safely During a Boil Water Advisory**
