Iris, Pale Yellow Iris pseudacorus Iridaceae (Iris Family)

Category:

Prohibited Noxious

• Information: Native to Europe. • Life cycle: Perennial. • **Root:** Bulbs and rhizomes. • Leaves: Long, linear, dark green. Leaves emerge from ground in fanlike arrangement. Smooth edged, mostly basal leaves are flattened, sword-like with a pointed tip and raised midrib, and erect with upper part arching. Stems: 90 -120cm tall, round to flattened. • Flower: Large pale to deep yellow flowers have three downward- and three upwardpointing petals, some with light-brown to purple veins or flecks.

Seed/Fruit: Three-angled cylindrical capsule
2-10cm long, contains many flat brown seeds.
Toxic: Horses, cattle, sheep, goats.
Control:
